

PRESS RELEASE

## Former BlackRock Climate Infrastructure CIO Rory O'Connor joins Energy Infrastructure Partners Investment Committee

- Mr. O'Connor brings 14 years of experience as investment committee chair of BlackRock Climate Infrastructure

**ZURICH, April 21 2026** — Energy Infrastructure Partners AG (EIP), a leading energy infrastructure investor focused on the megatrends of decarbonization, digitalization and security, is pleased to welcome Rory O'Connor as an independent member to its Investment Committee. Mr. O'Connor brings more than two decades of senior investment and leadership experience in energy and climate infrastructure from his time in NTR plc, a long-term sustainable infrastructure investor, and at BlackRock.

Mr. O'Connor spent 14 years at BlackRock where he served as Chair of the Investment Committee and Global Chief Investment Officer for BlackRock Climate Infrastructure. During this time BlackRock Climate Infrastructure invested globally in onshore and offshore wind, solar, energy storage and electric vehicle charging infrastructure. Mr. O'Connor was a founding member of the Climate Infrastructure platform at BlackRock and played a central role in building and scaling the platform and team globally.

"Rory brings investment experience that cuts across cycles, the analytical mind required for long-term international portfolio construction and a deep knowledge of system-critical energy infrastructure," said Roland Dörig, Founder and Managing Partner of Energy Infrastructure Partners. "His voice will be an invaluable addition to our Investment Committee as we continue investing in supply-critical assets across Europe and beyond."

"I am delighted to join EIP's Investment Committee," said Mr. O'Connor. "EIP has built a strong reputation as an entrepreneurial and long-term investor in essential energy infrastructure. I look forward to contributing my experience and insights in global energy and climate infrastructure investing to EIP's investment decisions and portfolio development."

### **About Energy Infrastructure Partners AG**

Energy Infrastructure Partners invests in energy infrastructure for decades to create exceptional value for our clients and partners. With EUR 7.5 billion under management, our investments focus on three megatrends — decarbonization, digitalization and security — that require trillions of investments in the energy sector over the next decades. We use our extensive industry network, deep transaction experience and close partnerships with leading energy companies and the public sector to develop and manage investment solutions for institutional investors globally. With headquarters in Zurich and offices internationally, our global team includes 29 nationalities united by three core values: entrepreneurship, excellence and trust.
